What we'll cover today

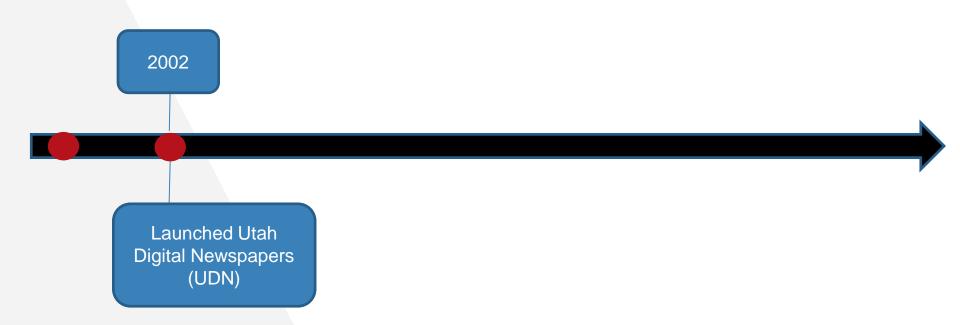

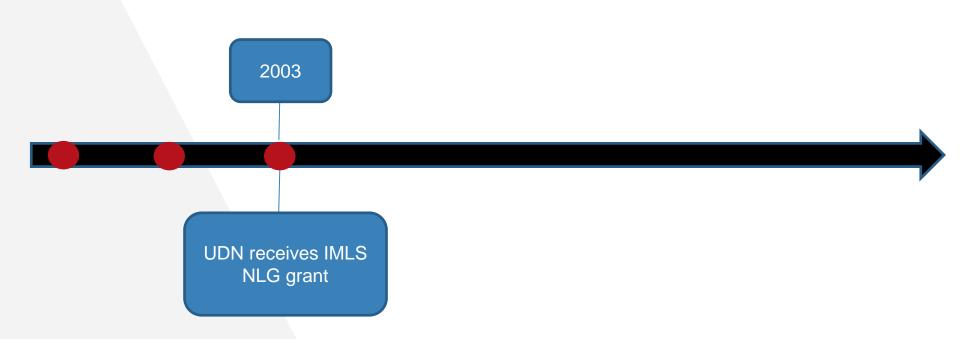

- **▶**History
- ►SIMP demo
- **►**Migration
- Lessons learned

2010

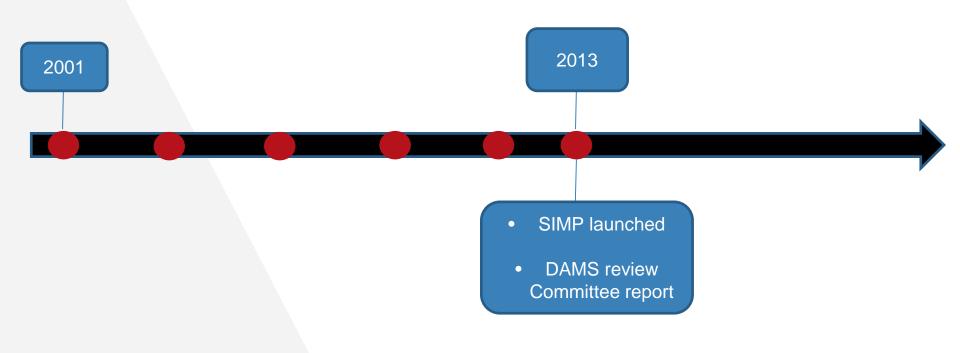

UDN reaches 1 Million pages milestone

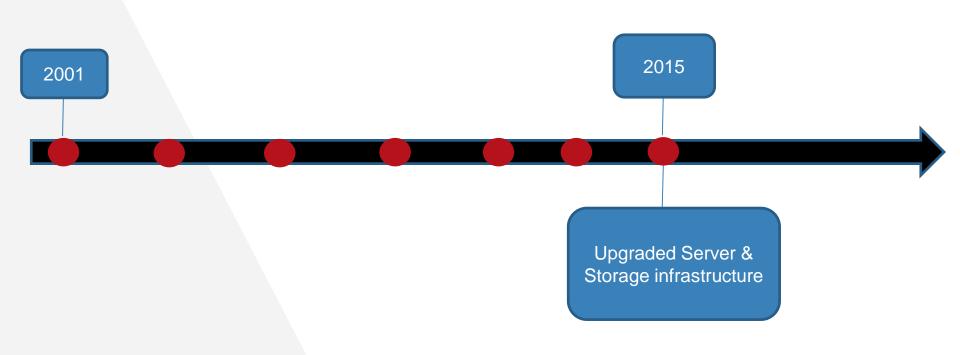

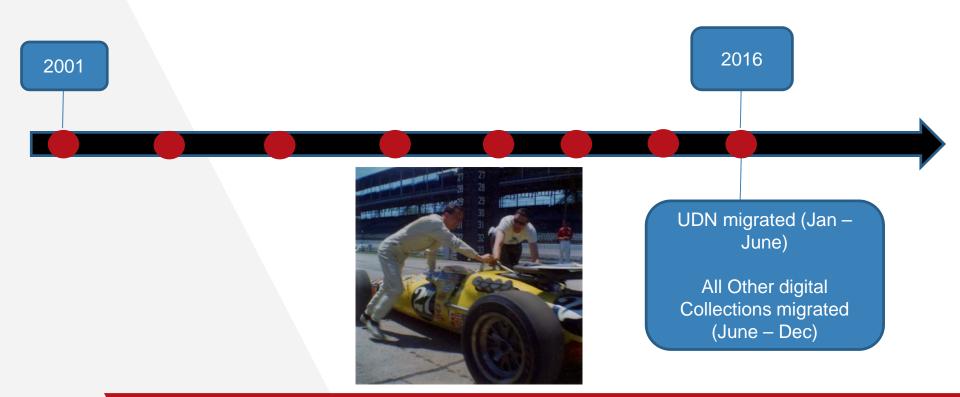

2001

- Purchased Rosetta for long term archiving
- SIMP development started

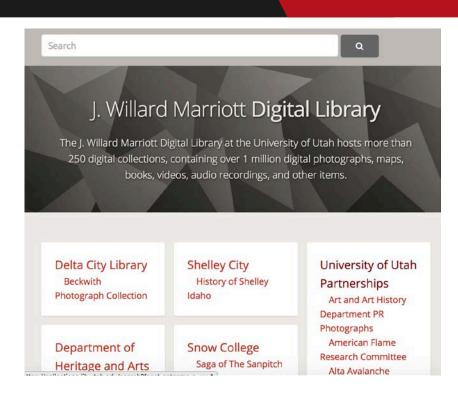

Marriott Library Digital Collections

- ▶269 collections
- ▶717,858 IEs (items)
- ▶139,583 compound objects
- ▶12 file types (images, videos, pdfs...)
- ▶3 TB storage
- ►Over 50 partners (internal and external) hosting collections with the Marriott Library

https://collections.lib.utah.edu/

Utah Digital Newspapers (UDN)

- ►~1.926 Million pages
- ▶~21.64 Million articles
- ►~138 Newspaper titles
- Article level newspaper data
- Many unique papers not in Chronicling America

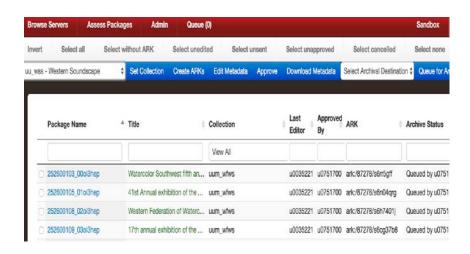

https://digitalnewspapers.org/

SIMP Tool for metadata management

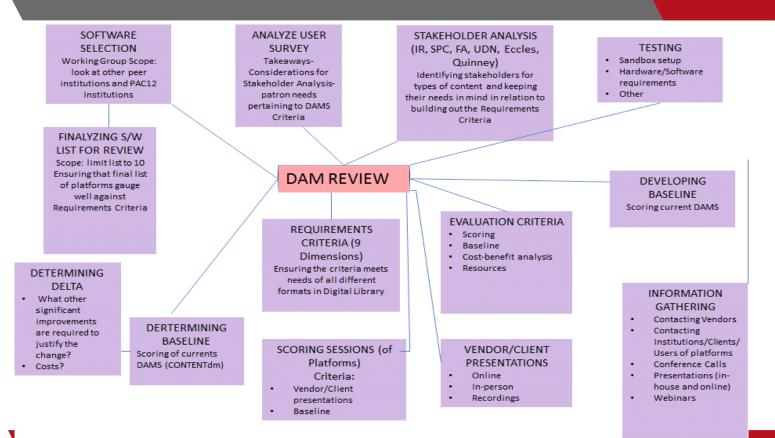

- Initially designed to facilitate management between CONTENTdm and Rosetta, our preservation system
- ► Platform agnostic and modular, provides ability to use other DAMs/Preservation Systems
- ▶ Options for automatically extracting some metadata (format, OCR text)
- ▶ Updated in 2016 to support Solphal

More details available in D-Lib article: http://www.dlib.org/dlib/july14/neatrour/07neatrour.html

DAMS Review in 2013

DAMS Review in 2013

DAMS Review - requirements criteria

Patron ease of use

- End-user experience
- •Search options and accuracy discoverability of the content
- Handle all formats in similar fashion for all browsers
- ADA compliance

Types of content supported

- •Major content categories (e.g. IR, newspapers, EAD)
- •File types and datasets
- •Tiers of content (both object and item level)
- Media streaming

Issues related to ingest/conversion/exit

- Workflows for adding new content
- Converting existing collection data
- Barrier(s) to exit

Collection administration

- •Interface design
- User permissions
- •Website configuration
- Statistics/Reporting/Logs

Metadata administration

- •Metadata creation, editing, and maintenance options
- Faceting
- Copyright/Embargo
- Search Engine Optimization (SEO)

Integration with other library platforms

- Discovery layer (e.g. Primo)
- Digital preservation system (e.g. Rosetta)
- Locally developed tools (e.g. SIMP Tool)

Technical infrastructure/administration

- Scalability of collections/content
- Hardware/Server(s) specs
- •API support
- •System and server installation, configuration, and upgrades
- •Internal resources required to run the system

Technical support

- Training
- •Help desk

Future and strategic directions

DAMS Review Outcome - Solphal

Hardware Requirements - CONTENT on vs Solphal Library Indicated Marriott Library

CONTENT

- •2 servers (UDN & Digital Collections)
- •Digital Collections (2x12 Core 3.0 Ghz, 64 Gb mem) UDN (2x8 Core 2.4 Ghz, 96 Gb mem)
- Scalability issues
- Limited customizations

Solphal

- •3 VMs (indexing services, UDN, and Digital Collections)
- •VMs avg. 2 cores, 3 Gb mem
- Extremely small footprint (hardware and power savings)
- Highly scalable and sustainable
- •Fully customizable
- Easy replication and cloud-centric

Benefits of Solphal

- •In-house expertise and support
- •Student, patron, and partner convenience
 - faster response times
 - advanced search functions
 - front-end metadata editing
 - customized interface
- •Substantial power, hardware, and licensing cost savings
- •Improved workflows and QA/QC for all teams
- •Staff time savings = ~1 less FTE supporting servers
- •Demonstrating and sharing open source solutions with other institutions

Indexing Improvements

Utah Digital Newspapers

- •55 GB of metadata
- •21,648,462 records
- •CONTENTdm
 - Full re-index ~ 1440 hrs (site is online)
 - Full re-index ~ 240 hrs (site is offline)
- Apache Solr indexing
 - Initial index ~ 2.75 hrs
 - Incremental index ~ instant

Digital Collections

- •6 GB of metadata
- •2,248,922 records
- •CONTENTdm
 - Full re-index ~ 144 hrs (site is online)
 - Full re-index ~ 72 hrs (site is offline)
- Apache Solr indexing
 - Initial index ~ 25 min
 - Incremental index ~ instant

User Interface Improvements

Utah Digital Newspapers

•CONTENTdm

- Page load times (avg) 10s
- Pdf display issues

Solphal

Page load times (avg) under 500ms

UDN migration vs. Digital Collections migration

Utah Digital Newspapers

- •Newspapers metadata more standardized, but not perfect
- •Inconsistencies with titles, dates, paper names, and type fields
- •Clean-up for nonstandard characters, newspaper names issues
- •Previous architecture had one newspaper title split into multiple collections (scalability issues)
- •Consistent field names and metadata meant that migration happened sooner and faster

Digital Collections

- More communication needed with both internal and external partners during migration
- •Problem or missing metadata values in older collections not fixed (yet)
- Field label standardization
- Standardization of type and format
- Lots of clean-up work still to do in the future

No external partners to contact

Metadata issues: Corrections

Metadata Standardization

Establish core fields needed for faceting and queries in new DAM, and change varying fields to the following:

Creator	
---------------------------	--

- Date
- Subject
- Rights
- Spatial Coverage
- Type
- •Title

Title	Mr. J. Holman Waters: Recollections of Samuel Newhouse, Salt Lake City, Utah: an interview by Hynda Rudd, July 16, 1977
Creator	Waters, J. Holman, 1912-1995
Date	1977-07-16
Spatial Coverage	Salt Lake City, Salt Lake County, Utah, United States

Delete Unneeded Legacy Collections

Future metadata corrections - next steps

Review 441 fields manually, noted issues (field used in only one collection, field synonyms)

Develop spreadsheet to cluster possible fixes by partner, write up metadata recommendations - ongoing process

To do:

- •Explore possibilities of assessment scripts against solr to review metadata values
- Explore visualization tools

Evacuation and relocation of Japanese Americans (United States : 1942-1945)	1

Roadmap for future development

Solphal (Front end) development

- •International Image Interoperability Framework (IIIF)
- RDFa and schema.org support

SIMP Tool enhancements

- Workflow automation
- •Large updates monthly, small updates as needed

Large projects

- •IMLS Grants
 - Newspapers in Hydra (LG-70-17-0043-17)
 - Western Name Authority File (LG-72-16-0002-16)
- Born digital content
- Partner projects
- Data Repository
